

- > Connection of up to three M-Bus slave devices
- > 10/100 Mbps Ethernet interface
- > TCP or UDP datagram message transmission
- > Supported connection modes: client or server
- > Simple web interface for configuration
- > Wide operating ranges of DC and AC power
- > Safeguards and filters insuring high durability of the entire device against surges and failures

Overview

EthMbus-3SL LITE is a communication converter for remote communication with M-Bus meters over the Ethernet network for building or home automation and other similar applications.

This is a simplified version of the SMART converter which offers only basic communication mode where the converter works as a transparent gateway for the transfer of M-Bus messages using the Ethernet protocols TCP or UDP in a client or server arrangement.

Electrical characteristics are identical to the SMART version except for a lower power consumption in the LITE version.

Technical parameters

Ethernet communication interface

Communications interface	10BASE-T or 100BASE-TX (auto-sensing)
Communication protocols	ARP, UDP, TCP, ICMP, AutoIP, DHCP, HTTP
Connector	RJ45
Compatibility	Ethernet: Version 2.0/IEEE 802.3

M-Bus Master communication interface

Number of devices that can be connected	1 to 3 SLAVE devices, idle current max. 4.5mA
Baud rate	300-9600 bps
Protection	- overvoltage protection TVS 400W - electronic protection against overloads and short circuit on the communication line, note: converter can withstand a temporary short circuit on the communication line
Galvanic separation	1kV from power supply, >1kV from Ethernet

Power Supply

Recommended range of power supply voltages

DC power	8.5V to 36V
AC power	8V to 26V
Protection	overvoltage protection TVS 400W
Power consumption	1.2W to 1.9W depends on M-Bus line load and communication. Max. consumption during M-Bus line short 2.9W.

Temperature

Operating range	0°C to 45°C
-----------------	-------------

Mechanické parametre prevodníka

The converter is built in a standard plastic box designed for mounting on a 35 mm DIN rail. The converter has a very small width of just 17.5mm. Weight of the converter is 52g.

EMC compatibility

EMC compatibility of the M-Bus converter has been tested according to the following standards in an accredited laboratory.

EMC emission tests

Standard	Test	Level
EN 55022	Power line - CONDUCTED EMISSIONS 10/150 kHz - 30 MHz	Class B
EN 55022	RADIATED EMISSIONS (Electric Field) 30 MHz - 1000 MHz	Class B

EMC immunity tests

Standard	Test	Level
EN 61000-4-2	ELECTROSTATIC DISCHARGE (ESD) - Contact discharge	± 4kV
EN 61000-4-2	ELECTROSTATIC DISCHARGE (ESD) - Air discharge	± 8kV
EN 61000-4-4	ELECTRICAL FAST TRANSIENT/BURST - Power line	± 4 kV
EN 61000-4-4	ELECTRICAL FAST TRANSIENT/BURST - M-Bus line	± 4 kV
EN 61000-4-5	SURGE IMMUNITY - Power line. Common/differential mode.	± 1kV / ± 0,5kV
EN 61000-4-5	SURGE IMMUNITY - M-Bus line. Cable shielding.	± 4 kV
EN 61000-4-5	SURGE IMMUNITY - M-Bus line. Common/differential mode.*	± 1kV / ± 0,5kV
EN 61000-4-6	CONDUCTED DISTURBANCES, INDUCED BY RADIO-FREQUENCY FIELDS 0,15MHz - 80 MHz. Power line and M-Bus line.	3 V

* Test carried out at the request of the manufacturer. The M-Bus port of the converter achieves the highest level of overvoltage protection according to the EN 61000-4-5 standard. Carrying out this type of test is not required with the use of shield cable.
